HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?

For the trailing 12-month period ending September 30, 2025, the Partners Fund Class A delivered a 15.36% no-load return. The Partners Fund generated excellent absolute and relative investment results with its contrarian value portfolio. The Fund’s results underperformed its primary benchmark, the S&P 500 Index, during the period due to the lack of AI and Magnificent 7 technology stocks in our portfolio.

WHAT FACTORS INFLUENCED PERFORMANCE

The Fund’s greatest contributors to outperformance relative to the Russell 1000 Value benchmark, it’s secondary, better fit benchmark came from the relatively defensive Health Care, Utilities, and Consumer Discretionary sectors which generated positive stock price performance along with above-average dividends. Strong stock selection of high-quality companies exhibiting meaningful normalized free cash flow growth across all sectors also contributed to the Fund’s results.
